maia ...stylish and durable

the complete solution for your solid surface needs

The **maia** range comprises a 28mm thick work surface, as well as the very popular 42mm thickness. Available with square or curved corners, **maia** gives you flexibility and choice to include in your unique kitchen design.

maia is also designed to make fitting your work surface as quick and easy as possible. All surfaces are completely factory finished and we've now added 3.6m long sink modules to reduce the number of joints that you may need.

The innovation doesn't stop there. Our acrylic undermount sink modules are fully factory fitted with smooth flowing lines for the most luxurious of finishes.

maia...sink modules

maia has a range of undermounted sink modules which are sold as part of a specially fabricated 1.8m or 3.6m worktop with the sink area centrally positioned.

Our sink modules come complete with either maia brushed stainless steel sinks or white acrylic bowls. Our sinks have an attractive 25mm radius to the corners and each is also supplied with the necessary waste fittings and pipework - all you have to do is add the tap.

The acrylic undermount bowls are factory fitted to the module to give a beautiful, flowing, seamless finish to your sink.

Whichever option you choose, your maia undermount sink will bring a bespoke feel to your kitchen and be as practical as it is good looking.

colours. Con-
added drama.

maia Mocha ①
Mocha brings a deep brown to the
maia range. As neutral door
colours such as latte and cream
grow in popularity, so Mocha
really comes into its own.

maia ... Works Service

sometimes you need out of the ordinary worktops specially configured for your kitchen plan

For some time now the **maia**® range has delivered high quality worktop solutions but on occasions the standard **maia** products do not cover everyone's requirements. **maia's** 'Works Service' offers you access to **maia** products specially configured for your kitchen design drawing using a combination of hi tech machinery and hand finishing. Ask your kitchen designer for more details.

Example products...

maia* ...designed for living, designed for life!

maia* solid surfaces come with a ten-year guarantee*, and are supported by the FIRA Gold Award for product excellence – this is testimony to the fact we only use the most superior materials, and our products are constantly tested to ensure they are manufactured to the highest possible standards. *Guarantee covers manufacturing, not installation.

maia has been developed to be used in the domestic environment – particularly the kitchen. Although no 'special' maintenance is needed we recommend the following is adhered to, as prevention is always better than cure.

Routine cleaning

maia does not require any specialist cleaning regimes – most dirt and light residue will easily wipe away with a damp cloth and soapy water. The worksurface should then be rinsed with clean water and wiped dry. Persistent marks can be removed by using a mild-abrasive cleaner, but harsh scouring powders should be avoided. If in doubt, consult our care and maintenance guide.

Heat

maia's surfaces will withstand heat better than many alternative surface materials. However, all hot pots, pans and other heat generating devices should always be placed upon a trivet or worktop protector rods, to prevent extreme heat having prolonged and direct contact with the surface. Boiling water and cooking splashes do not harm the surface.

Staining

maia, unlike marble and granite, will resist most household chemicals including alcohol and cosmetics however, some chemicals and strong dyes can cause damage and discolouration. If spillage occurs wipe off immediately and rinse area thoroughly.

Minor scratching

Kitchen utensils and crockery (particularly the unglazed bases) can sometimes cause scratches that will be particularly evident on darker colours. The surface can be damaged by scratching or cutting with knives, so the use of a cutting board is essential. Don't worry though, any minor scratches can easily be removed using a red abrasive pad and other items from the Care Kit. Please refer to the care and maintenance guide.

maia - Care Kit

To help maintain your **maia** worksurface, a Care Kit is available from your retailer. This kit contains all that you need to make minor repairs to the surface and a special cleaner that helps to maintain, protect and build up a lustre particularly on darker colours.

Our commitment to customer service

When you choose **maia** you can be safe in the knowledge that you are getting a proven, reliable product; a product that is truly at the forefront of worksurface technology.

Our customer care department is on hand to offer you help, support and advice all year round call **01773 521 300**.
